

### Persian Yellow Rose

*Rosa foetida 'Persian Yellow'*

Height: 7 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 2b

Other Names: *Rosa foetida f. persiana*

Group/Class: Shrub Rose

#### Description:

A beautiful shrub rose, featuring showy, fully-double yellow flowers in late spring to early summer; tall upright habit, very hardy and resistant to disease, makes a great flowering hedge or specimen; all roses need full sun and well-drained soil

#### Ornamental Features

Persian Yellow Rose features showy lightly-scented fully double yellow ball-shaped flowers at the ends of the branches from late spring to early summer. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves turn yellow in fall. The spiny brick red bark adds an interesting dimension to the landscape.

#### Landscape Attributes

Persian Yellow Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Persian Yellow Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Persian Yellow Rose will grow to be about 7 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
