Lilac Squirrel Bottlebrush

Sanguisorba hakusanensis 'Lilac Squirrel'

Plant Height: 24 inches

Flower Height: 3 feet

Spread: 24 inches

Spacing: 20 inches

Sunlight: ○ ◐

Hardiness Zone: 4a

Other Names: Ornamental Burnet

Description:

Bottlebrush plants are lacy and full of lilac-pink bottlebrush-like flowers thru summer that are ideal for cutting, held atop attractive compound leaves; adds texture and movement to gardens, containers and landscapes

Ornamental Features

Lilac Squirrel Bottlebrush features airy spikes of lilac purple flowers at the ends of the stems in mid summer. Its attractive textured oval compound leaves remain green in colour throughout the season.

Landscape Attributes

Lilac Squirrel Bottlebrush is an herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Lilac Squirrel Bottlebrush is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

Planting & Growing

Lilac Squirrel Bottlebrush will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 20 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 15 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

At Dutch Growers, we treat this plant as a "HOBBY PLANT". It is not officially recognized as winter-hardy in our zone 3, however, there is a strong liklihood that it will survive winter. Warranty expires on Nov. 1 season of purchase.
